

Pacific Exterior

Pacific Exterior was created for companies and other organisations looking for a modern, streamlined style. The curved panels, made from surface-treated aluminium and galvanised steel, withstand harsh weather and physical loads. The system is modular, so you can create and build on a complete solution at your own pace. Pacific Exterior supplements Pacific Interior to create an aesthetically cohesive look both indoors and out.

Features

- Withstands harsh weather and physically challenging environments
- Panels heat painted in the desired colour
- Hidden locking system protects against unwanted changes and theft
